PROFESSIONAL SUMMARY

Results-driven Full Stack Web Developer with expertise in building scalable, dynamic web applications using modern frameworks and technologies. Proficient in both front-end and back-end development with hands-on experience in PHP (Laravel), React, JavaScript, and MySQL. Demonstrated ability to deliver complex projects from concept to deployment, including e-commerce platforms, management systems, and interactive web applications. Strong problem-solving skills with a focus on creating user-friendly, responsive solutions.

TECHNICAL SKILLS

Programming Languages: HTML5, CSS3, JavaScript, PHP
Frameworks & Libraries: Laravel, React, jQuery, Bootstrap, WordPress
Databases: MySQL, SQL
Tools & Technologies: Git, XAMPP, Laragon, RESTful APIs, AJAX, Responsive Design, Authentication Systems

KEY PROJECTS

Food Park – Online Food Ordering Platform — *Laravel, PHP, MySQL, Bootstrap*
https://github.com/NehaaMemon/food-mark
- Designed and developed dynamic food ordering platform using Laravel framework with customizable portion sizes and user preferences
- Implemented comprehensive authentication system for users and admins with role-based access control and secure login/registration
- Built robust admin panel for managing food items, categories, orders, and user accounts with full CRUD functionality
- Integrated secure payment processing and order tracking features for enhanced user experience

Smart Travel Booking Platform — *PHP, MySQL, JavaScript, Bootstrap*
https://github.com/NehaaMemon/smarttravel
- Built intuitive travel booking system featuring advanced search filters and personalized travel recommendations
- Optimized backend performance for faster data retrieval and efficient transaction processing
- Implemented user-friendly interface with responsive design for seamless booking experience across devices
- Developed booking management system with real-time availability updates and confirmation workflows

Society Management System — *PHP, MySQL, Bootstrap*
https://github.com/NehaaMemon/Society-managment-system
- Developed comprehensive residential society management system to efficiently manage blocks, houses, and staff
- Implemented full CRUD functionality with secure database interactions and modular layouts for consistency
- Designed for local deployment via XAMPP, providing user-friendly interface for society administration
- Created dashboard for tracking maintenance requests, payments, and resident information

Golf Club Management System — *PHP, MySQL, JavaScript, Bootstrap*
- Created web application for managing club memberships, events, and comprehensive member profiles
- Implemented member registration system with profile management and activity tracking
- Developed event scheduling and registration features with automated notification system
- Designed intuitive admin interface for club operations and member communications

React Games Application — *React, JavaScript, CSS3*
https://games-app-react.netlify.app/
- Built interactive gaming platform using React with multiple mini-games and responsive UI components
- Implemented state management and component lifecycle methods for seamless user experience
- Deployed on Netlify with continuous integration for automated builds and updates

Resume Template Generator — *React, JavaScript, Bootstrap*

https://templateresume.netlify.app/

- Developed dynamic resume builder application allowing users to create professional resumes with customizable templates
- Integrated form validation and real-time preview functionality for enhanced user interaction
- Designed responsive layout ensuring optimal viewing across all devices

EDUCATION

Saylani Pakistan   *2025 – 2026*

Web And App Development — *Focus: Web Development, Database Management*

K.M.A Girls Degree College

Higher Secondary School Certificate (HSSC) – Commerce

K.M.A Girls School

Secondary School Certificate (SSC) – Computer Science
